

Government Property Control

The CIMA Government Property Control solution helps you meet requirements to report Department of Defense (DoD) property in custody of contractors. Our solution aligns with industry business processes and is designed to integrate with enterprise resource planning systems.

- Manage government property information
- Link key government property documents
- Email alerts for critical government property events
- Generate government property reports
- Assure compliance with the FAR and DFAS

Key Features

- Record and monitor DoD property assigned to contractors
- Separately identify government furnished equipment (GFE) and contractor acquired property
- Maintain administrative and cost data required to submit DD forms and supporting SF schedules in accordance with FAR and DFAS
- Store all DD Forms 1662, 1637 and supporting documentation submissions to the government electronically
- Link receipt and disposition documents for government property (optional)

Automatic Electronic Notification of Key Events and Activities

- Upcoming report submission dates
- Receipt of government property
- Shipment of government property

Reporting

- DD Forms 1662, 1637 and Supporting Documentation
- Government Property Inventory History Report
- Inventory Cost/Value Summary Report
