

Progress Billing

The CIMA progress billing solution collects the information to bill customers based on contract progress billing schedules. Our solution aligns with industry business processes and is designed to integrate with enterprise resource planning systems.

- Enhance cash flow
- Manage the progress billing process
- Link key progress billing related documents
- Email alerts for critical progress billing events
- Prepare government or prime contractor submission

Key Features

- Manage labor, material and other direct costs
- Manage indirect costs (fringe, overhead, G&A, material and handling, cost of money)
- Create and maintain rate tables with escalation rates
- Generate SF1443 and supporting documentation
- Export to or incorporate custom progress billing forms
- Manage liquidation pool
- Store documents and progress billing related documentation for easy access

Automatic Electronic Notification of Key Events and Activities

- Timing for each progress bill
- Past due progress bill preparation
- New contract awards received
- Contract amendments received

Reporting

- SF1443 and Supporting Documentation
- Liquidation Pool Status Report
- Progress Bill Revenue Summary Report
